

Human Rights in good hands!

Human rights are in dire straits. After Saudi Arabia took the chair of a panel of independent experts on the UN Human Rights Council, the Saudi Arabian dictatorship goes wild with impunity. At the end of 2015, the Wahhabi regime went on a beheading spree and more is still to come. As long as the US Empire keeps its protective hand over this despicable regime nothing will change. Therefore, regime change should be the top priority of the West if it doesn't want to lose all credibility. Why has ISIS suddenly stopped its beheadings? Came the order from its Godfather King Salman¹ or have all of the terrorists turned into pious acolytes?

A picture is worth a thousand words.
